

# MUHAMMAD ALTAF

FULL STACK DEVELOPER

+923471691530 • akaltaf610@gmail.com [›Linkedin](#) [›Portfolio](#)

---

## SUMMARY

I am a Full Stack Developer specializing in the T3 stack (Next.js + TypeScript) for web development and also have knowledge in ReactNative for mobile apps. I excel in building REST APIs and managing databases like PostgreSQL and MongoDB, alongside hands-on intermediate experience in CI/CD pipelines.

---

## WORK EXPERIENCE

### Full Stack Developer

- I have the work experience of 1.2+ year in as a Full Stack Developer and have done solo projects.
  - Working at the FUTURE DEV SOLUTIONS company and outgoing
- 

## PROJECTS

### 1- Future soul Application

- Developed Future Soul, a full-stack matrimonial platform using Next.js 15, TypeScript, and PostgreSQL with real-time messaging, subscription management, and admin dashboard
- Built comprehensive user authentication system with OTP verification, profile management, interest matching, and secure payment processing
- Implemented real-time messaging, subscription billing, user verification, and admin panel using Socket.io, Prisma ORM, and modern React components.
- Created responsive matrimonial application with user registration, profile browsing, interest requests, and comprehensive admin dashboard for user and subscription management

### 2- FlexTrack Application

- Built a dynamic gym management web application with Next.js, featuring real-time subscription pricing with automatic currency conversion based on user location (USD to PKR/EUR/GBP).
- Implemented role-based access control for gym owners and members, with integrated payment processing, member management, and multi-location support using Prisma ORM and PostgreSQL.

### 3- POS System, App and Website for A Nail Salon [›Visit](#)

- Complete salon management platform featuring two specialized apps: Globar Staff App (complete reservation CRUD, payroll and earning management, user-based admin/staff roles, profile management, push notifications, ticket management, turn trackers) and Globar Customer App (service purchasing, salon services, Stripe payment integration). Both apps feature Firebase push notifications and comprehensive salon operations management.

### 4- Event Management Platform - Irreecha Festival [›Visit](#)

- Event management app, Festival management software, QR code check-in app, React Native event app, Next.js event system, Prisma PostgreSQL event backend, Cultural festival app, Sponsor management app, Mobile event registration system, Event community engagement app.

### 5- Video Call & Chat Web Application (Real-time)

- It is a secure video conferencing and online meeting platform built. It offers real-time video calls and live chat messaging—all powered by WebRTC, Socket.IO, and a clean React.js frontend. The goal was to create a fast, lightweight, and privacy-first experience for users needing hassle-free video communication.
- **Note:** Projects those links are not added , has been delivered and they changed domains that we do not know

## SKILLS

• NEXT JS	TYPESCRIPT	CI/CD PIPELINES
• REACT JS	JAVASCRIPT	MONGO DB
• PRISMA	NODE JS	REACT NATIVE
• RESTful APIS	POSTGRESQL	

---

## EDUCATION

- Govt Associate College Marot
  - Intermediate in Computer Science ( 2024-2025)
- 

- **Technical Skills:** Project Management, Clean Code Management

- **Languages:** English, Urdu , Punjabi
